

MyStudentBody-Drugs

National Institute on Drug Abuse (NIDA) SBIR #2R44 DA018552-02

8/5/2004-2/29/2008

PI: Emil Chiauzzi, Ph.D.

The MyStudentBody-Drugs study was conducted with students with a history of drug use within the past 90 days. They were randomized into the MyStudentBody-Drugs or Control (treatment as usual) groups. Results revealed a significant improvement on drug knowledge for the experimental group compared to the control group between baseline and post-intervention. Of the students in the field trial who used the MyStudentBody-Drugs program, 89% expressed that they liked the website overall, 81% rated the quality of information as "very high," 74% thought that it was extremely useful at addressing substance use issues relevant to college students, and 75% felt extremely confident that it could answer questions that they have relating to substance use, misuse, or abuse.
